

Airbi AIRWASHER – humidifier and air purifier 2 in 1

Key features

- 2 devices in 1: humidifies and purifies the air from dirt in the environment
- 5 operating **modes**
- **Built-in digital hydrostat**
- **Natural evaporation**
- **Water as a filter**
- **Rotary discs with antibacterial treatment and BSS filter**
- **PLASMA system**
- **Very quiet operation**
- **Clear LCD display**
- **Automatic shut-off when the water tank is empty**

Description

Airbi AIRWASHER is a unique device that combines two instruments in one device - **humidifier and air purifier**. Its automatic operation is able to maintain optimal humidity. The **natural evaporation** of the water is located on the very small and light particles, leads to a better dispersion of microparticles of water than that of traditional humidifiers. Another great advantage is the fact that the **water that naturally evaporates** is without leaving visible traces in the form of mineral substances caught on furniture. **AIRWASHER** can do much more - with the help of water as a natural filter for trapping dust in the air. Use of this product **is very simple** and **cost of operation is very low**. To prevent bacterial growth in the water, appliance is equipped with a **patented filter BSS (Bio- Silver Stone)** and the inner rotating disc with a **special antibacterial** cover. AIRWASHER captures up to 99.9% of bacterias in the air.

Plasma system - AIRWASHER **generate** clusters of **plasma ions**, which not only help to capture dust particles, but also destroying 99.99% of influenza viruses (H1N1) in air. This feature is optional and user may it turn off if necessary. **AIRWASHER is very silent (30-24 db)** and among its other benefits belongs **low energy consumption** (only 8 W). The device can be used in 5 working modes - automatic, high, medium, low, night mode. There is also a **safety feature** - in the case of water shortage the unit will turn itself off and the control panel alerts the user via a flashing icon.

Technical parameters

Water tank capacity:	4,5 l
Humidifier power:	Up to 250 ml/h
Air output:	156 m ³ /h
Power consumption:	8 W
Noise level:	24-30 dB
Frequency:	50/60 Hz
Voltage:	220-240 V
Designed for rooms:	Up to 45 m ²
Colour:	white
