

Airbi BLOCK – Air Dehumidifier

Key features

- desiccant air dehumidifier
- decrease air humidity
- output up to 3 l per day
- 2 fan speeds
- timer
- possibility to drain the condensed water with a hose (included in box)
- protection against tipping
- water tank with 2 L capacity

Description

Do you suffer from uncomfortably high humidity levels in your room? Airbi BLOCK is the device for you. It **can capture up to 3 liters of water in one day**, which would otherwise allow the spread of dangerous spores and mold.

It is a **desiccant dehumidifier**, which means that **it works well even at lower temperatures**. You can therefore use it also in unheated basement, garages, laundry rooms, workshops or storage rooms.

The collected water is kept in a **two-litre container**, which you can pour out regularly, or you can use a small hose to **lead the water into the draining**. The air inlet of the device is equipped with a pre-filter, which removes hair and other gross impurities from the air.

You can easily control the speed of the built-in fan with the **touch buttons** or set the **timer** for 2, 4, or 8 hours.

Technical parameters

Water tank capacity:	2 L
Max. dehumidifying capacity:	up to 3 L / day (+30 °C and 80 % RV)
Operating temperature:	0–50 °C
Power consumption:	200–370 W
Noise:	30–45 dB
Power input:	220–240 V, 50/60 Hz
