

Digital wireless thermometer and hygrometer CONTROL

Key features

- measuring indoor temperature and humidity
- includes one wireless sensor monitoring climate in another location
- possibility to extend up to three wireless sensors
- memory for MAX and MIN values
- radio-controlled time display
- graphical representation of the development of humidity over time
- ventilation tips in the form of icons on the display
- frost or mold forming warning

Description

The digital wireless thermometer and hygrometer Airbi CONTROL measures room temperature in the range of -10 °C to + 50 °C and room humidity in the range of 20-95%. The package also includes one wireless temperature and humidity sensor, which communicates at a distance of up to 100 m (outdoors). The sensor is designed for both indoor and outdoor use. In addition to the current values, the instrument display also shows the measured min. and max. values (automatic reset at 0:00). The Airbi CONTROL can receive the current time (DCF) on the radio and its display can also be used to monitor the graphical development of indoor humidity over time. The advantage is also various additional information icons such as tip for ventilation, frost and mold forming warning or information about the expected change in internal humidity, if there is an exchange of air between indoor and outdoor space.

Technical parameters

Temperature measurement range:	Base station: -10 °C ... +50 °C Sensor: -20 °C ... +60 °C
Humidity measurement range:	Base station and sensor: 20-95 %
Temperature measurement accuracy:	+/- 1 °C (0 °C...+40 °C), otherwise +/-2 °C
Humidity measurement accuracy:	+/- 5 % (40...80 %)
Power supply:	Base station: 3x 1,5 V batteries AAA (not included) Sensor: 2x 1,5 V batteries AAA (not included)
