

Airbi CUBOID – Top-fill ultrasonic humidifier

Key features

- **Ultrasonic humidifier**
- **Easy top-fill design**
- **Built-in hygrometer**
- **Manual operation with 3 speeds**
- **Night mode**
- **Timer**
- **Aromatherapy**

Description

Airbi CUBOID is a reliable solution for fighting the dry air. This humidifier operates using a proven and efficient ultrasonic principle. From the top nozzle, a visible mist of micro-droplets rises and evaporates. Airbi CUBOID can add up to **300 ml of water per hour** to the air in your room. Its **pleasant minimalist design** fits into any interior.

The top-fill design makes the water tank easy to fill. The device is operated via touch buttons, offering you a choice of **3 power levels**: high, medium, and low. Airbi CUBOID has a **built-in hygrometer** that informs you of the relative humidity level in percentage on the display. This makes it easy to determine whether the air is still dry or if it's time to turn down or switch off the humidifier.

Additional features include a **night mode** (which turns off the display backlight) and a **timer** (allowing the device to operate until the set time expires). Naturally, there is also a safety feature to prevent the operation with an empty tank. Once the water runs out, the device will automatically power off.

You can also make use of the **aromatherapy function**, if you want to. Simply add natural essential oil to the designated drawer, and along with the cool mist, a pleasant fragrance will spread from the device.

Technical parameters

Water tank capacity:	4 L
Humidifying power:	up to 300 ml/h
Power consumption:	25 W
Noise:	< 35 dB (A)
Power input:	220–240 V, 50/60 Hz
