

# Evaporative humidifier Airbi EVO WiFi

## Key features

- principle of natural evaporation for disease prevention
- top-fillable water container
- hydrostat for automatic operation
- 4 modes of operation
- traffic timer
- low noise and consumption
- LCD touch screen and WiFi mobile application

## Description

The evaporative air humidifier EVO WiFi will protect the health of your family from dry winter air, which dries out our mucous membranes and thus disrupts their function as the body's natural barrier against respiratory diseases. The great advantage of the principle of natural evaporation, on which this device works, is its low operating costs and minimal noise (< 35 decibels). In addition, compared to other humidifiers, EVO WiFi emits only micro-droplets of water without mineral substances into the air and does not unnecessarily clog the furniture and objects in the room with their dust. This will ensure the desired increase in air humidity without side effects.

Another great advantage that you will appreciate with regular use is the top-fillable water container. Just pour water into a bottle or kettle and easily pour it into the container. There is no need to carry the container, and thus the risk of spilling water or dripping onto the surroundings.

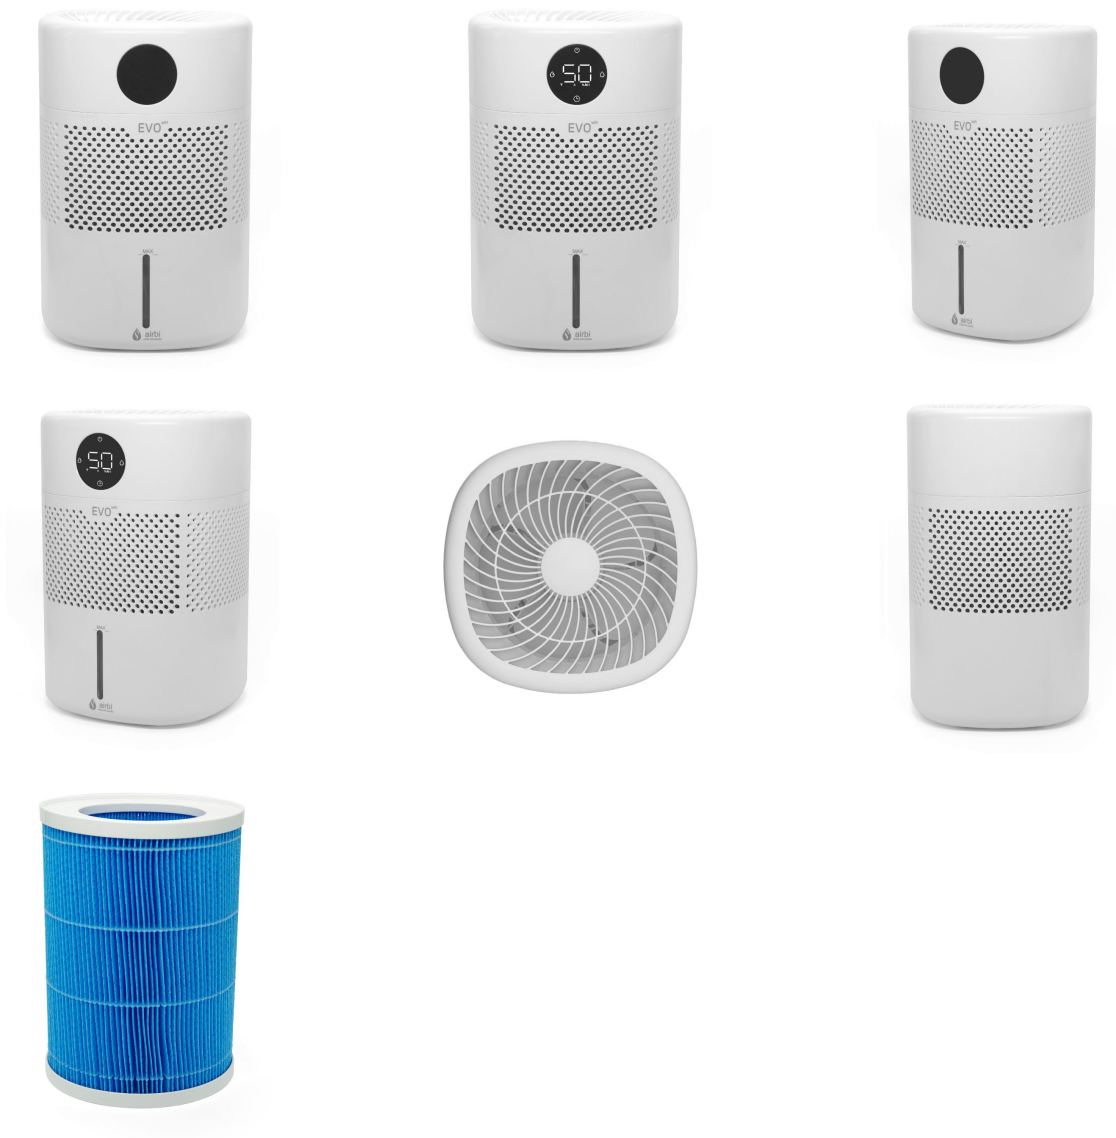

EVO WiFi has three manual power levels, but thanks to the built-in hydrostat, it can be fully automatic. The hydrostat ensures that the ambient air humidity never exceeds the limit set by you. Once EVO WiFi reaches it, it will stop working. But when its value drops, the device immediately turns on the speed and adjusts the humidity to the set level. And the fact that you don't have to worry about anything is also proven by the safety fuse, which immediately switches off the device when it runs out of water. If you only want to turn on the device for a certain period of time, you will definitely appreciate the 2, 4 or 8 hour operation timer function.

EVO WiFi is a new generation humidifier and, in addition to a modern touch LCD display on the device, it also offers the possibility of control via the Tuya smart mobile application, through which you can easily connect the device to your home WiFi network. You can thus turn on the device via your mobile phone from work, and when you return home, the humidity value will be ideal.

## Technical parameters

Water tank capacity: 3 l  
Humidifier power: 150-300 ml/h  
Power consumption: 5 W  
Noise level: < 35 dB  
Frequency: 50/60 Hz  
Voltage: 220-240 V  
Designed for rooms: max. 45 m<sup>2</sup>  
Colour: white
