

Airbi FAN DESK–personal fan

Key features

- 3 power levels
- Natural wind mode - imitates outdoor wind gusts
- Built-in rechargeable battery (3,000 mAh)
- USB-C charging port
- Adjustable head for precise airflow direction
- Versatile use - for standing or hanging

Description

The Airbi FAN DESK is an elegant and practical portable fan that combines modern design with excellent functionality. Thanks to its compact size and lightweight construction, it becomes your reliable companion when fighting the heat—whether at home, in the office, bedroom, or on the go.

The powerful battery provides maximum independence when using the fan, allowing operation even when no power outlet is nearby.

The **built-in rechargeable battery** has a **3,000 mAh** capacity and provides **3–9.5 hours of operation** (depending on the selected speed). The device features a **USB-C connector**, which allows charging from a power bank, TV, PC, or suitable adapter (not included). The **digital display** keeps you informed about battery charge status and current settings.

The device is easily operated with a single button. You can choose from **3 speed settings** and a **natural wind mode**. For an even more comfortable experience, this mode **mimics outdoor wind gusts by varying the speed** between the lowest and highest power levels.

You can use the fan on a desk or other suitable surface, or hang it. The tilting head allows precise airflow direction. Its compact size saves space on your desk, while quiet operation won't disturb work or rest. The stylish minimalist design complements any interior.

Technical parameters

Battery run time:	3–9.5 hours
Battery:	Li-Ion 3.7 V 3 000 mAh 11.1 Wh
Input:	DC 5V 2 000 mA (± 20 %)
Power cable:	USB-A to USB-C
Dimensions:	140 x 70 x 147 mm
Weight:	370 g
