

Airbi HUMID – humidifier and air purifier 2 in 1

Key features

- Purifies and humidifies the air
- Natural evaporation
- Air filtration through water, HEPA and carbon filters
- Built-in digital hygrometer
- Ionizer
- Very quiet operation
- Clear, intuitive control panel
- Automatic shut-off when the water tank is empty

Description

Airbi HUMID helps with dry and polluted indoor air. Its **proven design** helps wherever breathing difficulties are caused by **low humidity, airborne dust, or other pollutants**.

First and foremost, HUMID is a **high-performance air humidifier** that uses **natural cold evaporation**. Water evaporates from special, slowly rotating discs inside the unit, and a fan spreads the humidified air around the room. **Because the water turns completely into vapour, it leaves no visible white dust** from dissolved minerals on furniture, TVs, and other surfaces, which is a common problem with ultrasonic humidifiers.

Airbi HUMID **uses very little energy** and is **easy to operate**. Its **built-in hygrometer** keeps indoor humidity at the optimal level of 40–60%.

Airbi HUMID also works as an **air purifier**. Air is filtered through **water** and, above all, through **combined HEPA and carbon filters**. The **HEPA filter** captures more than 99.95% of **fine dust particles**, along with **bacteria, viruses, mould spores, pollen, and other airborne contaminants**. The **carbon filter** absorbs **odours, fumes, and volatile organic compounds (VOCs)**. The tank also has a replaceable antibacterial **BSS (Bio-Silver Stone) filter**.

The device also has a **built-in ionizer** that restores the balance between positive and negative ions.

Airbi HUMID runs **quietly** (max. 35 dB(A)) and uses **little energy** (<15 W). It also has safety features, including a **child lock** and **automatic shut-off** when the water tank is empty.

Technical parameters

Water tank capacity:	6,2 L
Humidifier power:	Up to 350 ml/h
Air output:	330 m ³ /h
Power consumption:	<15 W
Noise level:	<35 dB(A)

Frequency: 50/60 Hz

Voltage: 220-240 V

Designed for rooms: max. 45 m² / 112 m³

Colour: white
