

Indoor digital thermometer and hygrometer LINE

Key features

- The device is used to control the internal temperature and humidity for a healthy environment
- Memory for maximum and minimum values
- Time and date display
- Alarm clock function
- Sound notification for hours
- For standing or hanging

Description

The Airbi LINE digital thermometer with hygrometer measures room temperature in the range of 0 °C to +50 °C and room humidity in the range of 20 to 95%. The display is divided into two halves, the current time/alarm time is displayed on the left, the measured temperature and humidity are displayed on the right. In addition, the device also remembers the measured MAX/MIN values since the last manual reset and offers an audio notification function every full hour.

Airbi LINE has a flip-out stand and there is also an opening for hanging on the wall. The user has the option to display the temperature in degrees Fahrenheit or Celsius or switch between displaying the time and the current date.

Technical parameters

Temperature measurement range: 0 °C to +50 °C

Temperature measurement accuracy: +/- 1°C

Humidity measurement range: 20-95 %

Humidity measurement accuracy: +/- 5 % (40...80%)

Power supply: 1x AAA battery (not included)
