

Aroma diffuser for kids with ambient light Airbi PET

Key features

- design with popular animal motifs – cat, dog, owl
- different modes of LED lighting
- continuous/interval mode of operation
- traffic timer (1 hour)
- automatic shutdown when the water runs out
- quiet operation (max. 40 dB)
- ultrasound technology

Description

The Airbi PET aroma diffuser is a great companion for children, helping them fall asleep more easily. Just add water and a few drops of soothing essence to it, and in no time your child will be breathing contentedly. Thanks to the original animal design (cat, dog or owl) and the possibility of pleasant backlighting, your child will have a friend in his room with whom he will feel safe at night. The diffusers offer 7 different colors of light (white, warm white, red, yellow, purple, green, light blue, dark blue). Choose one of them permanently or let them alternate smoothly. This backlight can be turned off completely. In addition, you can also choose the operating mode of the device. In continuous mode, the diffuser will run until it runs out of water or you turn it off. Interval mode works so that the device works for 30 seconds and rests for 30 seconds. This saves the filling and prevents you from losing the scent after a while.

In addition to the health benefits brought by individual essential oils, the diffuser brings one more advantage – it humidifies the air in the room and thus protects children from diseases. Moistened respiratory mucous membranes are much better at capturing bacteria and viruses that would otherwise enter the body.

The PET diffuser also offers a timer function for one hour, during which time it will provide a pleasant fragrant company to the sleeping child. It then turns off automatically to allow the child a peaceful and undisturbed sleep.

Technical parameters

Power supply: AC 100-240V, 50/60 Hz (input)
DC 24V (output)

Water tank capacity: 250 ml

Material: ABS + PP

Noise level: < 40 dB (A)

Model: Cat, dog, owl
