

Air purifier Airbi REFRESH

Key features

- Air quality sensor
- Air quality indicator
- Filter replacement control system
- 4 operating modes
- Safety fuse
- Children's lock
- Ionizer
- Operation timer

Description

Airbi REFRESH is the multifunctional air purifier that uses the latest methods of air purification. REFRESH uses **4 multiple filtration system** and its air flow volume is designed to be sufficient up to 30 m² rooms. The greatest advantage of Airbi REFRESH is its **automatic mode** that use high quality air sensor for control of machines fan. It has several advanced functions: **timer, child lock or anion generator. Air purifier is equipped with ultrasilent motor (30 dB) and very precise particle sensor** that measures small particles up to 2,5 µm. Very useful help feature is the control system for replacement of filters.

The device has **LED display** for easy identification of each function. Each function can be easily set with the buttons at the front panel. **You can quickly learn the air quality thanks to the colour indicator** – green colour means good conditions, orange indicates worsened air quality and red states bad air quality score. Air purifier Airbi REFRESH positively influences the environment around us by **improving the breathing** and destroying dangerous viruses in the air. **Airbi REFRESH is suitable also for allergic people**, because it is able to get rid of the allergens presented in the air.

Filtration system

- 1. Pre-filter** - the main function of this filter is to catch large dust particles in order to prolong the life of the others filters. This filter is washable.
- 2. Activated carbon filter** - absorbs various smells, such as formaldehyde. This colourless gas with a strong odor is often considered the most dangerous harmful substance inside flats because it is highly irritating for the upper airways and eyes.
- 3. True HEPA filter** - removes particles that have a size of 0.1 µm with efficiency of more than 99.9 %. It removes dust, pollen, smoke, animal allergens and fungal spores.
- 4. Ionizer** - the negative ions generator creates a great amount of negative ions and therefore the air stays fresh. This function is optional.

Technical parameters

Air output: Up to 200 m³

Power consumption: 40 W

Noise level: 30 - 55 dB

Ionizer: 20 millions/cm³

Designed for rooms: max. 35 m²

Colour: white
