

Air purifier Airbi RESPIRE

Key features

- automatic and manual operation (3 power levels)
- colour indication of room air quality
- night mode
- filter change indication
- optional ioniser and UVC LED lamp functions
- mobile app
- operation timer

Description

Airbi RESPIRE is a unique partner for home. With high-end features such as a choice between modes, colour indication of air quality, night mode, filter change indicator, ioniser, UVC LED lamp and the ability to connect to a mobile app, the Airbi RESPIRE air purifier not only delivers clean and healthy air, but also a sense of comfort and control over your environment. Whether it's a normal day or a quiet night, Airbi RESPIRE is always a reliable guide for clean air in your home.

Filtration system

1. Catalytic filter: breaks down ammonia, benzene and other hazardous substances in the air. These can be released, e.g. from new carpets, furniture, etc.

2. Formaldehyde filter: in combination with the catalytic filter, it breaks down even the smallest particles of toxic substances such as formaldehyde. This colourless, strong-smelling gas is often considered the most dangerous pollutant in indoor environments as it causes irritation of the mucous membranes of the upper respiratory tract and conjunctivae. The filter is made of the highest quality materials and long durability.

3. The antibacterial filter is made of very dense, cotton non-woven fabric. Air is the main medium for the spread of influenza and other respiratory diseases. The filter destroys bacteria, absorbs moisture and thus prevents the formation of mould.

4. HEPA filter: this filter has the ability to capture particles with a diameter of 0.1 microns with an efficiency of more than 99.9%, thus removing dust, pollen, smoke, animal allergens and mold spores from the air.

5. UV-C LED lamp: eliminates viruses, bacteria and other organic pollutants. This function is user-selectable (it can only be turned on or off in the mobile app).

6. Ioniser: the negative ion generator produces a large amount of negatively charged ions to keep the air fresh. This function is user selectable (it can be switched on or off). can be turned off only in the mobile app) and also helps to clean the air.

Technical parameters

Rated voltage:	220-240 V, 50/60 Hz
Power:	45 W
WiFi frequency:	2,4 GHz
Standard IEEE:	802.11 b/g/n
Max. radio power:	20 dBm
Dimensions:	330 x 175 x 433 mm
Weight:	4,4 kg
Air output:	Až 200 m ³ /h
Noise level:	32/40/54 dB (A)
Room dimensions:	15-30 m ²
