## Description

Reliable, high quality and discreet device that helps you to create a great mood, relax after a day full of hard work and stress, mask the unpleasant smells of cigarette smoke or pets. Ultrasonic technology will also help you to moisturize the surrounding air, which is especially important in the winter when it is necessary to prevent too dry air. Dry air drains the eyes, nose, skin and also increases the risk of influenza. SONIC supports children's imagination with 7 different alternating colors, each can be permanently set (can also be turned off). Ideal night light for a children's room. SONIC also has a bluetooth speaker, so you can stream music or fairytales from your smartphone. You can also choose between continuous or interval mode. In interval mode SONIC works for 20 seconds and rests for 40 seconds. SONIC also has 2 levels of steam intensity. Depending on the settings, the operation time can be 12-36 hours. All the settings can be changed using both the buttons on the unit and the remote control. When emptying the water tank, the aroma diffuser will automatically shut down. SONIC comes in three different decors – white, light wood and dark wood. It is a portable appliance suitable for household, yoga, office, sauna, bedroom or children's room. Perfect gift for the whole family and friends who love aromatherapy.
