

Air purifier Airbi SPACE WiFi

Key features

- Air quality sensor
- Air quality indicator
- Filter replacement control system
- 6 operating modes
- Night mode
- Safety device in the event of a rollover
- Children's lock
- Ionizer
- Ultra-quiet engine
- Operation timer

Description

Airbi SPACE WiFi is mobile air purifier for large spaces with a precise particle sensor, automatic mode and multi filtration system. The air quality in many workplaces is not always ideal. Our professional air purifier Airbi SPACE WiFi provides easy **solution for dust, pollen, odours and chemical gases**. Its powerful motor only needs a few minutes to provide a room up to 160 m² in size with fresh, clean air. **The unit is mobile** and, thanks to its robust casters, can be moved easily to position it in another room. Airbi SPACE WiFi uses multi-layer filtration system that is suitable for elimination of bacteria, odours, allergens or volatile organic compounds. **A precise laser sensor** that measures small particles up to 2,5 µm is integrated for the purpose of continually monitoring the air in the room and controlling the automatic mode. It has several advanced functions: **night mode, timer, child lock or anion generator**. Very useful help feature is the control system for replacement of filters.

The device has **LED display** for easy identification of each function. Each function can be easily set with the buttons at the top panel. **You can quickly learn the air quality thanks to the colour indicator** – blue color means perfect conditions, green colour means good conditions, orange indicates worsened air quality and red states bad air quality score.

Airbi SPACE WiFi is a highly modern device with the possibility of remote control and monitoring of values. It has a built-in WiFi receiver, so you can use the application to turn the purifier and its individual functions on and off, or monitor air quality values when you are away, from anywhere in the world, all you need is a smartphone / tablet and an internet connection.

You can download the Smart Life application at [Google Play](#) or [Apple App Store](#).

Air purifier Airbi SPACE positively influences the environment around us by **improving the breathing** and destroying dangerous viruses in the air. **Airbi SPACE WiFi is suitable also for allergic people**, because it is able to get rid of the allergens presented in the air.

Filtration system

1. **Pre-filter** - the main function of this filter is to catch large dust particles in order to prolong the life of the others filters. This filter is washable.

2. **Activated carbon filter** - absorbs various smells, such as formaldehyde. This colourless gas with a strong odor is often considered the most dangerous harmful substance inside flats because it is highly irritating for the upper airways and eyes.
3. **True HEPA filter** - removes particles that have a size of $0.1\ \mu\text{m}$ with efficiency of more than 99.9 %. It removes dust, pollen, smoke, animal allergens and fungal spores.
4. **Ionizer** - the negative ions generator creates a great amount of negative ions and therefore the air stays fresh.

Technical parameters

Air output: Up to $800\ \text{m}^3$

Power consumption: 85 W

Noise level: 30 - 66 dB

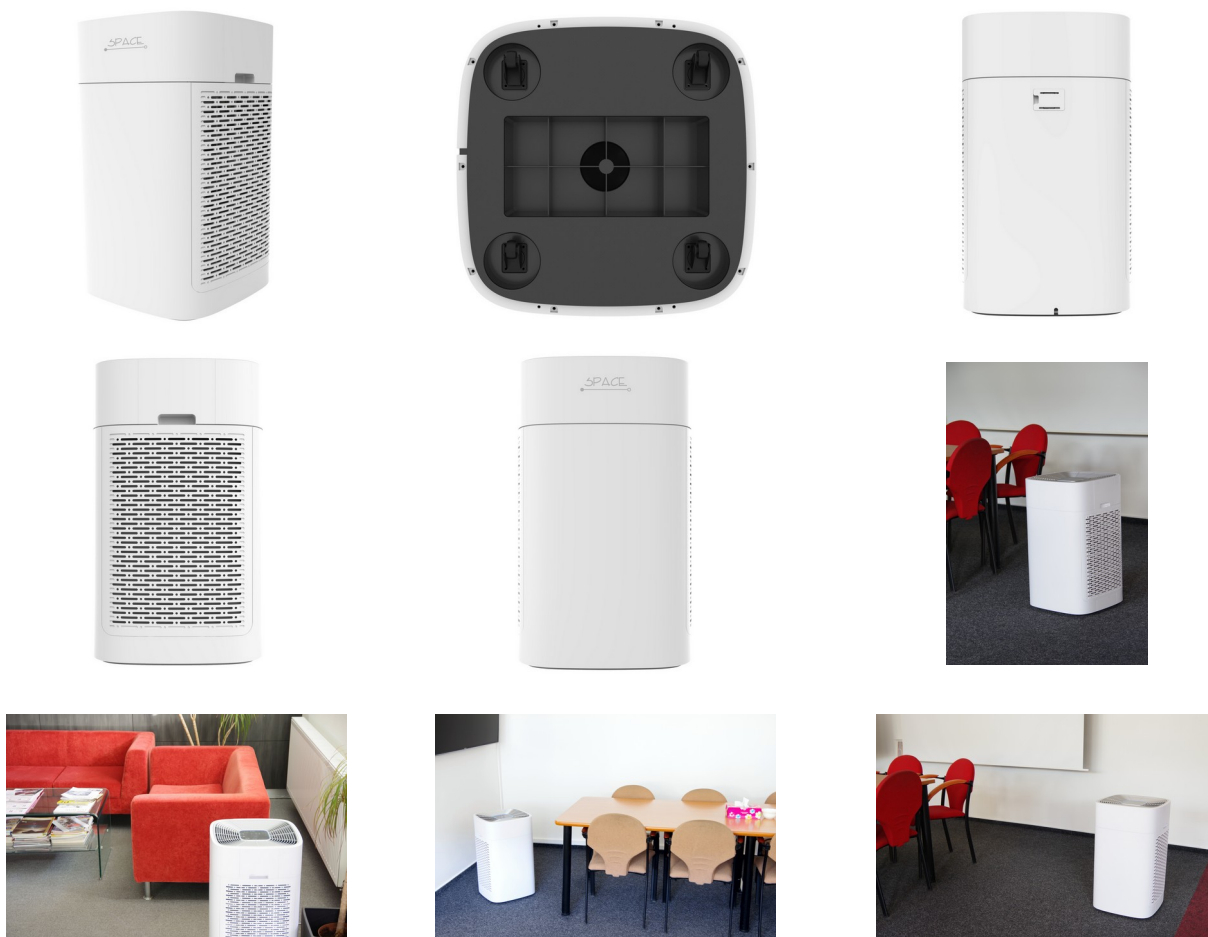

Ionizer: 10 millions/ cm^3

Designed for rooms: max. $160\ \text{m}^2$

Colour: white
