

Ultrasonic humidifier with plasma system and aromabox Airbi STAR

Key features

- 3 in 1 – humidifier plasma system and aromatherapy
- Digital hydrostat and thermometer
- Water and antibacterial filter
- Steam heating for a faster effect
- Large tank for 6 litres of water
- Manual and automatic operation
- Multi-directional rotary output nozzle
- Remote control
- Large and clear LCD display
- Operation timer
- Automatic shut-off when the tank is empty
- Handle for convenient water replenishment
- Option to dim and switch off the backlight

Description

The ultrasonic humidifier **Airbi STAR** is ideal for clean and healthy air and it will help you to ensure optimal climatic conditions in your home. The STAR is a **multi-purpose device (3 devices in 1)**, as it is equipped with a **humidifier**, an **PLASMA system** (it helps to clean the air) and an **aromabox**, in which the user can add essential oils to enjoy the beneficial effects of aromatherapy.

At first glance, the humidifier STAR impresses with its black **luxury finish** and a wide range of features such as **adjustable operating time (timer)**, **night mode**, **preheating function**, **acoustic and visual indication of empty water tank or the remote control** that is included. More demanding users will appreciate the **multidirectional swivel outlet nozzle**, **large LCD display**, dimming or turning off **blue lighting** (e.g. for children not to be afraid to fall asleep) or a large and easy-to-fill water container with a **convenient carrying handle**.

The advantage of the STAR ultrasonic humidifier is its **high performance and very low energy consumption**. Airbi STAR releases clean and fresh steam into the ambient room. An **antibacterial and water filter** captures the minerals contained in the water and prevents further dispersal of these particles. The device is also equipped with a **built-in digital hydrostat and thermometer**.

Users of the Airbi STAR can choose between **4 operating modes (SMART mode** - intelligent mode where the device itself sets the target humidity value, which it tries to maintain depending on the ambient temperature, **MANUAL mode** - the user sets the intensity of output steam manually, **AUTO mode** - the user sets the target humidity he wants to maintain, **CHILD mode** - the device attempts to maintain the humidity at 55%, the PLASMA system and preheat functions are enabled) to select the mode that best suits his needs.

Technical parameters

Water tank capacity: 6 l
Humidifier power: 120-350 ml/h
Power consumption: 30-110 W
Noise level: < 35 dB
Frequency: 50/60 Hz
Voltage: 220-240 V
Designed for rooms: max. 45 m²
Colour: black
