- 4 Wind Modes:
 - Normal – cycles between low, med, high
 - Sleep – depending on speed it use natural mode for while and continue in low natural mode
 - Natural – there is oscillogram for each speed in natural mode
 - ECO – temperature sensing for best suited fan speed
 -
- Auto-off timer settings: 1,2,4 or 8 hours

Description

Airbi ZEPHYR makes a convenient and effective way to cool down any room during the warm season. Airbi has designed this fan with horizontal oscillation to evenly cool any area and features to allow more personalisation, by setting the air strength according to your needs during the day or night. This unit is also light weighted and does not require assembly. Airbi ZEPHYR has unique feature - **360° automatic dual oscillation function** – which allows you to set two different directions that you want to cool, so you can cool almost every corner of the room evenly.

With **three fan speeds and four operating modes**, you can tailor your desired wind level to your needs. Whether you need a higher speed to cool the room more quickly or slower speed to lower noise and release a gentle breeze while you are sleeping, this fan has you covered. Airbi ZEPHYR comes with an **automatic timer** so you can set how many hours to run before the fan will automatically turn off. The **remote control** will allow you to set your fan from a distance for your convenience or you can use the intuitive LED display.

Technical parameters

Power supply	Up to 500m ³ /h
Power consumption:	45 W
Battery:	3,7 V, 3000 mAh
Noise level:	<55 dB (A)
Colour:	white
